

# YCP AI Based Analytics Tool

Transform Your Procurement with AI-Driven Insights

## From Data Chaos to Procurement Clarity

BluMor automatically consolidates spend data across systems by detecting outliers, predicting trends, and highlighting savings opportunities, all in a user-friendly dashboard.

- Is your current spend strategy powered by actionable insights?
- Do you really know what every penny is doing?

## What Makes BluMor Different

### 1. Comprehensive Data Integration

BluMor consolidates data from multiple systems and geographies into a unified, accurate dataset.

### 2. Advanced Data Cleansing & Normalization

Our machine learning-driven process ensures clean, reliable data tailored to your business needs.

### 3. Deep AI-Powered Insights

BluMor detects hidden patterns and anomalies to uncover savings and compliance risks.

### 4. Flexible Vendor & SKU Clustering

We group similar vendors and products to streamline purchasing and reduce complexity.

### 5. Price & Payment Term Rationalization

We identify opportunities to standardize pricing and payment terms for better negotiation.

### 6. Tail Vendor Rationalization

We help shift spend from small vendors to strategic, larger relationships.

### 7. Intuitive Spend and Performance Dashboards

We deliver clear, actionable dashboards to guide smarter procurement decisions.

### 8. Strategic Procurement Optimization

We provide insights that improve supplier relationships, forecast demand, and enhance supply chain efficiency.

## **What We Offer**

BluMor equips organizations with AI-powered analytics to enhance procurement strategies. Our platform helps businesses navigate market dynamics, uncover cost-saving opportunities, and ensure accurate financial processes.

- **Insights Generation**

BluMor delivers comprehensive insights and visibility to reduce cost and complexity in procurement with tail vendor rationalization, SKU rationalization, and price variance.

- **Dashboards & Reporting**

BluMor provides clear, customizable dashboards for ongoing visibility and management with spend dashboards for leadership to monitor spend, variances, and savings with regular updates.

- **Trend Analysis & Forecasting**

Through predictive modeling and machine learning, BluMor analyzes historical purchasing data alongside external factors such as economic indicators, supplier performance, and market dynamics.

- **Invoice & Payables Audits**

BluMor ensures payment accuracy and optimizes cash flow by identifying duplicate invoice payments and transactions using audit fields to recover overpayments.
